The Story Premise

Angela lives on Earth with her boyfriend Leslie, her daughter Rose, and best friend Chrissy in 2052. They are both big into physics, technology, space exploration, and time travel. They work their whole lives to discover time travel and new planets. They discover time travel, go into the future, and use their newly discovered technology to meet aliens on an ocean planet in 3052. They must work together to save the alien race from destroying their race due to the greediness of money between neighboring races.

Timeline

It was the year 2052 in the United States. Angela, Leslie, Rose, and Chrissy traveled through time to the year 3052 in the U.S. Angela's family and friend Chrissy created a wormhole that would cast them into the future. The Earth had gone through a thousand years' worth of history. Flying cars had been invented and outdated. The current transportation system was a type of flying train. It is called the Hyperloop. It used the force of a magnetic pull to operate. Instead of DVDs, some holographic memories or movies were able to be viewed on a holographic phone. Art had become technologically driven. The food the U.S. ate became focused on nutritional value instead of sugar and fat. Americans were healthier and were no longer concerned about weight loss. The gas pumps automatically filled a car's tank using robots. Robots hovered around everywhere and threatened to take over daily tasks and human roles. They sometimes looked and sounded like humans. It was hard to tell the robots from the humans. Money was completely paperless. Holograms were used for every purpose. Both robots and holograms were used to teach, instruct, and work. They were both popular in the workplace. NASA had reached new heights. They had sent a team to Mars in the year 2,102. They had sent astronauts to distant galaxies to find extraterrestrials. They hadn't been successful until 3052. Everything was digital and robotic in 3052.

Angela, her husband Leslie, and her bestie, Chrissy, created a man-made wormhole to time travel to Wathena. It was in a galaxy one-hundred lightyears away called Triton. Their planet was an ocean planet. Wathena had an icy exterior, an ocean beneath, and a lava core in the center of their planet. Winter was its only season. Its people, the Asta, inhabited Wathena for a thousand years. In these many years, they taught each other their language called Neentikah. They had futuristic technology the Astas were strongly religious. They prayed to their Ancestral

god named Orios. They wore their precious metal, called Mesba, as beads around their neck. They used these beads in incantations and rituals to pray to their God, Orios. The Asta knew how to use magic because they had magical properties inside of their bodies. Their skin shot fire and frost. It could also heal their bodies. It let them connect to any life force around them. They shared a psychic connection with anyone and anything. In this way, they could feel each other's life force. They were connected to Wathena too.

The Asta had an enemy race living near them. They lived beneath the icy exterior in the water and are trying to weed the Astas from their world. They wanted to start a war to cause the deaths of fifty million Astas and rule the planet again. The Astas and Licends had never coinhabited the planet. They had always been at each other's throats. The Licends mine Mesba in their underwater caves. It grew in sacs on the cave walls. Both races had a peace treaty. It was put in place so they can share mesba. The licenses had violated that treaty. War was about to start. The humans felt compelled to stop the two alien species before they destroyed each other and the planet.

Main Characters:

Angela Procell

Angela Laster was thirty-five years old. Angela was slender, with long hair and she was a brunette. Her eyes were green. She was five foot and seven inches tall. At the time she weighed one hundred and ten pounds. Some people said she resembled Keira Knightley when she was younger. She was born in 2022 in Santa Clara, California. Her parents divorced when she was seven years old. She was an army brat. Her mother, Cristina Stringer, was in the military as a Sargent. Angela's mother made her childhood wonderful. Cristina was a devoted mother to her daughter. Angela had expensive fashion taste. She loved high-end trendy name-brand clothes. She loved to wear bold, expensive jewelry to match. Angela always went to get her nails and hair done and fixed at the salon. She usually wore her hair long and sleek. When she wanted to dress to impress, she wore it loosely curled. Angela was a clean and well-groomed woman. She always talked with her hands and waved them around when she became excited. Angela didn't curse. She had bad habits: she bit her nails, drummed her fingers, and repeatedly flipped her hair. She spoke English and didn't have an accent. She had a high pitch and spoke loudly. She spoke

with her hands. When she got excited, her hands waved around like a flag on a windy day.

Angela was pleasant to most people.

One of Angela's favorite quotes was, "I ran out of gi for my giddy up." In 2052 she was an astronaut for NASA. She was satisfied with her job and had worked there for ten years at NASA. She made \$161,141 annually at NASA. She was gifted in physics and mathematics, and Astrobiology. She knew her stuff. Her combat skills were horrendous.

Angela and her husband Leslie met at NASA. Her husband worked there a year before she showed up. Leslie put the moves on Angela as soon as he saw her. They dated for a year. That year they were engaged to be married. Leslie proposed on a ferry boat on the Cape. Angela cried for an hour afterward. She of, course said yes right away. She almost passed out. In her

defense, it was hot and humid that day. Angela's nickname for her husband was Les. Six months later Angela became pregnant with her daughter Rose Procell.

Cape Canaveral was a city on Florida's Atlantic coast. It was a metropolis with around nine thousand people at the time. Angela and Leslie lived in a large orange penthouse hoisted above the water in a safe community. They had very little crime in their neighborhood. They had an extremely nice penthouse with five bedrooms. It had original paintings by local artists throughout the house. The bedrooms were big, and the master bedroom had a hundred-inch hologram Wonder Vision television. Angela owned an Aloma 2.0 flying vehicle. Her vehicle was bright orange with blue stars like the galaxy on it. Leslie owned a lightning thunder 5.7 flying vehicle. His vehicle was royal blue with red flames on both sides. Both of their vehicles were registered to fly anywhere in the world. They both had top-of-the-line vehicles that could fly anywhere from thirty minutes to an hour. The vehicles had interchangeable tires that, if turned on their sides, could use jet fuel to hover them above the ground. Their vehicles could dock up with other vehicles in the air and drive themselves in a party line.

Angela, Leslie, and Rose had a corgi dog named Panda. They called her panda bear or panda pooh. She was black and white with a little tan color on her face. Panda loved when she got scratched. She was a very healthy dog. Panda always waited for Rose to get off the school bus and darted outside to meet her. She waited outside with her when the school bus picked her up and wouldn't go back home until she made sure she was safely on the bus. Angela's mom, Cristina Stringer, retired from the army in Ft. Stewart, Georgia. On Angela's eighteenth birthday, she moved to Boston, Massachusetts attended Harvard University. She earned her degree in physics. It took her six years to earn her degree. After that, she moved to Cape Canaveral, Florida. She acquired a job at NASA. She met her husband, Leslie Procell. They dated for a year

and then they married. Soon after, Angela became pregnant with her daughter, Rose Procell. Leslie and Angela shared a love of physics, mathematics, rockets, robots, aliens, area 51, and puzzles. They also loved modern and futuristic technological advancements.

They were married for six years and shared a beautiful daughter named Rose Procell. Rose loved science, like her parents. She was intelligent and good at math and science. Her parents got her an in-home tutor and babysitter who taught her advanced studies. Their daughter was gifted. Rose studied in the eighth grade at six years old. Angela had a best friend named Chrissy Hall. Chrissy worked at NASA with Angela and Leslie. She strongly believed in aliens, time travel, alien abductions, and magic. Angela and Chrissy were best friends for six years. They met each other a few months before Angela met Leslie. Chrissy wanted to travel with Angela, Leslie, and Rose into the future, she ached to go to distant galaxies to find new life forms with them.

Main Characters:

Leslie Procell

Leslie Procell was born on December 11, 2022. In 2042 He was five ft. eleven inches tall. He was a muscular man. Leslie had auburn hair and brown eyes. He grew up in a small town in Louisiana called Ebarb. He had two wonderful parents who loved him. He was amiable and respectful. Leslie loved to joke around and laugh at his jokes. He was funny and well-loved by all he knew and didn't know. He had a photographic memory. Leslie could bring up every conversation he had ever had or that of others he knew. He never lied or cheated at anything. He was brave and honest. He never once got a driving ticket. He obeyed the law and was mindful of others around him. He drove below the speed limit. Leslie was a Republican. He believed in the people of the United States. He lived the American motto, "One land, under God, for liberty and justice for all." Leslie believed in the American dream. He supported Veterans and the homeless and those with disabilities.

He enjoyed long walks on the beach with Angela, candlelit dinners with her when he discovered a new concept at work, scientific breakthroughs, a game of chess when he felt needed by his wife, bodybuilding at the gym, moonlit strolls with Angela, Bingo with the family, his mother-in-law, Cristina Stringer, his father-in-law, James Stringer, cruise vacations with the family, fresh snow on the ground, Toledo Bend Lake, his pets when he outsmarted his wife, movie nights with family, banana pudding, a good burger, ribs, potato salad, homemade coconut cream pie, strawberry pie, and opossum. His wife had a potato salad that she dubbed the baconator. Angela's dad, James Stringer, taught her how to make it when she was in her 20s. He loved gumbo with a passion.

His favorite songs were oldies from the 1970s and 1980s. His favorite movie was Home Alone 2. Leslie's most cherished line from that movie was, "You was smoochin' with my brother! Don't gimme that! You've been smoochin' with everybody! Snuffy, Al, Leo, Little Moe with the gimpy leg, Cheeks, Boney Bob, and Cliff." Leslie's favorite people were Angela and their daughter. He supported his family in every way. He always spoke softly to Angela; he treated her like his queen. He always loved and cherished her unconditionally. Leslie treated her with the respect she deserved, and she knew it. He would walk to the ends of the Earth for her. He loved his daughter and would give up his life for his wife and daughter. He always provided a steady income for his family. He kept a picture of his wife and daughter in his billfold. Leslie loved to whistle when he was happy.

Leslie was an avid reader like Angela. He liked to stick to non-fiction books, and his wife read fiction. His favorite books were about Einstein and the theory of relativity, physics, spaceships, the milky way, other galaxies, NASA, and the history of the United States. He loved books about former presidents. His favorite presidents were Thomas Jefferson and Theodore Roosevelt. Leslie was an early riser. He liked to get up around five a.m., even when he didn't work. He loved abstract art and paintings from the 1700s and 1800s. Leslie had acquired a few of these to hang on the wall in his penthouse. Some of his favorite artists were: Van Gogh and Pablo Picasso. Leslie was an excellent painter and he loved to draw. He loved old cameras, and he was good at photography. Leslie loved to take pictures of wildlife, nature, sunsets, and sunrises. He drew portraits. Leslie drew a beautiful portrait of his wife, that hung on their bedroom wall. He drew portraits of Rose throughout her life. Leslie drew one of her when she was first born, which Rose cherished. She had it on her bedroom wall above her bed. He disliked: cruel people, bossy individuals, people that put other people down, people who made fun of others, former President Joe Biden, the leftist agenda, unrespectful people, people who didn't care about if they got other people sick, coffee, dry sub sandwiches, chicken that was as dry as sandpaper, illegal aliens, people who used other people, and uncompassionate people.

Leslie grew up with two brothers and three sisters. His hometown was Ebarb, Louisiana. Leslie was very bright and gifted in science and mathematics. His parents called him the whiz-kid. At the age of eighteen, he graduated high school and moved to Princeton, New Jersey to study physics. He graduated with many honors six years later in 2042. He moved to Cape Canaveral that year to be close to NASA. He acquired a job at NASA, and it wasn't too long after he met his beautiful wife, Angela Laster. They would go on to have a baby together and named her Rose Procell. His daughter would turn out to be just as stubborn and strong-willed as

he was. Her intelligence matched her father's; he couldn't deny she was his child if he wanted to. They were both spitfires and had sassy mouths to boot. They both shared auburn hair, beautiful brown eyes, and a passion for life.

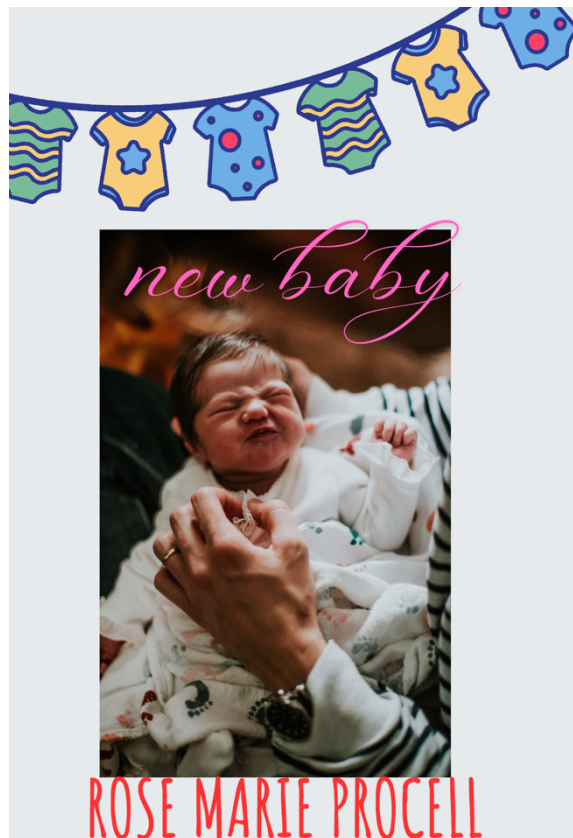

Rose Procell

Rose Loren Procell was born on January 18, 2046. She had brown hair and green eyes. She was born in a hospital called Star Morphosis Care Hospital in the metropolis of Cape Canaveral. She was born on the coldest day in January. Rose was intelligent from when she took her first breath. She did everything her way or no way. When the doctor spanked her behind after her birth, she didn't cry. Her doctor was Dr. Hildalgo. It took him three tries. When she finally did cry, she filled the room with a cry that boomed like a megaphone. She was just like her momma. People in the waiting room could even hear her scream. She didn't quit until they bundled her up, then she was at peace. She was born with blonde hair and green eyes, just like her momma. Her hands looked just like her father's hands. Her head was as big as a saucer, just like her momma's. She was a small baby, but not a premie. She was a healthy baby. She weighed seven pounds and seven ounces.

As she grew, she never was fussy, until she hit her terrible threes. Her grandmother, Cristina told Angela that was payback from when Angela was a baby. Her grandmother, Cristina Stringer told Angela she was just like Angela. Cristina was very lovable and always had good intentions. She taught her daughter to love themselves first and then they could love others. She taught them to be firm, yet fair. She wanted them to always be kind and generous. She told them not to bend over for someone to run over them in this life. Rose was just like her momma in almost every way. Rose never cried at night though, which was a welcome relief to her momma. She started to walk at an early age. In no time she started to speak. Her first word was momma, and her second word was dada. Rose's first sentence was, "Pick me up, momma."

When she was four, the school wanted to send her home and told her mother that they didn't teach deaf and mute children. She had spent her first week in school and had not spoken a word to anyone. Rose was shy as the day is long. As soon as her mother Angela showed up, Rose threw her arms around her momma and said, "Mommy!" The teachers were all shaken up. They couldn't believe she could speak. Rose went through another incident on the playground in school. The class had recess and Rose found a leaf to bring inside with her. She wanted to sleep with the leaf at nap time. Her teacher took the leaf away from Rose and Rose slapped her. Her mother was sent for yet again. Rose's teachers also noticed how incredibly smart she was and told Angela to test her to see if she could get into a higher grade level. Angela did that. Rose was several grades behind what she should have been. She was put in the gifted class as well.

At six years old grade. She could speed- alarming rate. Her IQ twelve. She spoke four Rose spoke English, French. She worked hours to learn German high hopes that one day and Korean as well. Her so proud of her that they always bragged about

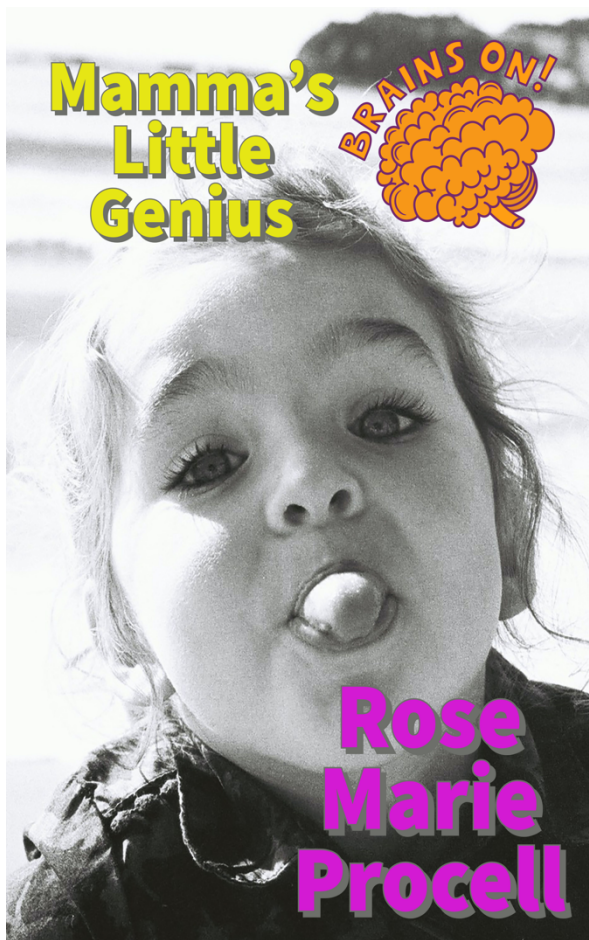

Rose was in the eighth read anything at an was one hundred and different languages. Spanish, Italian, and every day for three and Japanese. She had she could learn Chinese mother and father were could have burst. They her to their family and

friends. Her grandmother, Cristina, was so impressed by her she bought every textbook she could

with Rose's interests for her.

She loved science, physics, and math. She studied every subject she could. Rose loved art and photography like her father. She loved fashion and jewelry like her mother. Rose wanted to be a writer when she grew up. She wrote several short stories and poems. She wrote some manuscripts as well. Rose wanted to be an astronaut too. She couldn't wait until she was a grown woman. Rose wanted to go to the future with her mother and father when they made the man-made wormhole at NASA.

Chrissy Brooke Hall

Chrissy Brooke Hall was born in Valdese, North Carolina in 2022. Her mother was Donna Hall and her father was Donald Hall. Chrissy was born fighting. She had mid-shoulder-length brown hair thicker than a mule's hair. Her height when she met Angela was five foot four inches tall. Chrissy always spoke her mind. She loved to laugh. She didn't tell jokes much.

Chrissy loved to listen to jokes, though.

She was once married, but it ended in

divorce. She had two beautiful

children from her first marriage. Her

son was named Frankie Xavier Craig.

Her daughter was named Janeva Craig.

Chrissy's nickname for her was Neva.

Angela's nickname for her was Jane

and she also liked the nickname Neva,

but she preferred Jane. Both her

children spoke their minds like their

momma. Chrissy's favorite colors were

pink and black. She listened to emo-

style bands as a teenager. One of her

favorite bands was Evanescence. She

loved songs by Avril Lavigne, Taylor Swift, Katy Perry, Eminem, and the list goes on. She loved to play songs on constant repeat and at a level only dogs can hear. If she liked a song and she and Angela were headed down the airway, Angela was done for. She would repeat the song until the audio file quit working.

Her favorite classic movies were *The Nightmare Before Christmas* and *Beetlejuice*.

Halloween was Chrissy's favorite holiday. She decorated her home vibrantly every year, rain, or shine. She did anything for her children. They were her whole world. She was devoted to them.

Frankie was seven years older than Janeva. Frankie was nine and Janeva was two in 2052.

Chrissy always decorated gorgeous cakes for her children's birthday parties. People knew to watch out if they got Chrissy's feathers ruffled up. She was a southern girl with her mouth on her sleeve and her right hand was always on the good book. She loved God and wanted to teach her children to love him and have a relationship with him.

Chrissy disliked rude people with a passion. She was always kind-hearted to everyone. Her heart was so big it could have flown around the planet Earth ten times over. Chrissy was a genius and graduated from Yale University. She graduated with honors and earned her degree in physics and Artificial Intelligence. She was valedictorian and gave a speech that moved the audience so much that there wasn't a dry eye in the house when she was done. Chrissy had a passion and zest for life that not many people had. She loved: art painting, drawing, designing, and decorating. Angela thinks she should have gone to school for art too. She wanted her to go to SCAD university in Florida. She was skilled in physics, math, and art and had a second job working with Artificial intelligence. Chrissy knew how to build robots and make them look like humans. She knew how to make them function from the ground up. Chrissy had robot parts spread out all over her artistic mansion. Her mansion was hot pink and black. Inside she had

decorated every wall with her artwork. She loved painting abstract art as well as art from animated movies. Chrissy had one wall in her bedroom filled with the scenery and characters from the classic film, *A Nightmare Before Christmas*. Chrissy didn't want to relocate, and it would've been difficult for her children to adjust to a new life there.

She always did what was best for her children. Many people admired her because of this. Mother's Day was one of Chrissy's other favorite holidays. Chrissy first met Angela Laster when she went to work at NASA after she graduated from Harvard and moved to Cape Canaveral, Florida. The two women became fast friends right off the bat. They had a lot of shared interests. They both loved physics, distant galaxies, math, and science. Chrissy and Angela were at work when Chrissy looked up to see a new guy at work. She nudged Angela with her elbow to the chest. Angela looked up from what she had read.

Leslie and Angela locked eyes in an instant. Leslie smiled at her, and Angela felt embarrassed, so she looked the other way. Leslie used his best pick-up line to win Angela's affection. Leslie said, "The sparkle in your eyes is so bright the sun and stars must be jealous." She fell head over heels in love with the man after they had dated for a week. The three astronauts were a dynamic trio.

Supporting Characters:

Kanbar

Kanbar was an alien born on an ocean planet called Wathena in a galaxy one-hundred lightyears from Earth. He was born five hundred years ago in the year 2532. His people named a year a cyclon. Kanbar was as tall as a basketball player on Earth. He was around seven feet tall. Kanbar was slender and purple. His body resembled the shape of a muscular human frog. His eyes were large and yellow. He had a long blue tongue that could catch flying insects. Kanbar's alien race was known as the Astas. He was the leader of his people. Kanbar was the most intelligent of his people. He was psychic and could read any of his people's minds within a hundred-foot radius. He studied and knew every language in all the galaxies. He wore a sleek silver space suit when he was outside. His skin meshed through his space suit to connect with the Wathena. He could sense Wathena with a single touch of his hand. He could feel the geographical changes of the planet and sensed its various moods. Kanbar could shoot fire out of his fingertips and icicles from his palms. Kanbar had the power to heal with his touch. He had a magical core inside of him that all the Astas received from their Ancestors. The Astas were a tribal people who strongly believed in their ancestors. This belief was called Orlatex. Kanbar had a large necklace tribal necklace that he always wore. He believed in the spirits of his ancestors. The Asta's money source was a precious metal called mesba. They formed mesba into beads to wear around their necks. They believed mesba came from their ancestors. They used it as a form of money and trade as well.

Kanbar lived in a city called Wintapah. This city had spaceships, which turned into homes. They were surrounded by bubbles that could transport them anywhere and connect to

other bubbles. The bubbles were lightweight and fast when it came to transportation. The Astas controlled those bubbles with their mind. Wintapah had one hundred billion residents. Kanbar was the only son of Orios, Asta's ancestral God. Kanbar had ruled Asta for a thousand years.

He lived in a giant mesba home on top of a hill that was silver. The Asta considered him like royalty. He was married to Wisopia. She was his queen and ruled Wathena with him. Kanbar met her five hundred and seventeen years ago when Kanbar had taken a trip to the holy city of his people. After the first fifty years of marriage, Wisopia became pregnant with a little girl named Meslabita. The two parents put her in high esteem. They protected her fiercely with their lives. They never let her near the Licends.

Supporting Characters:

Wisopia

Wisopia was born on the ocean planet, Wathena, in 2557. She was six foot and eleven inches tall. Wisopia was purple and red, and her body looked like a frog woman's body. She was slender and her hair had rainbow colors. Wisopia had a magical core inside of her. She could connect with her surroundings, including Wisopia. She didn't look strong. Wisopia was as quick as Earth's cat woman. She had a fast tongue that served her well when she caught insects. She was not born of royalty. Her parents raised her to think on her feet. She was quick-witted and crafty. She enjoyed hunting for her food, ice fishing, and sneaking off to hunt for media in the ocean water below Wathena's surface. Wisopia disliked people whom she deemed as weak. She hated to show her weakness. She could read other creatures' thoughts and her own people's.

Wisopia met her husband when she took a trip to the ancient city of Linoka. This was an abandoned city that had the homes of their ancestors. She went hiking into one of the valleys to look at an ancestral home. It took her an hour to get there.

Surprisingly, she saw Kanbar praying in a meditation trance in the center of the room. She waited for him to finish. She was fascinated by him and wanted to get to know him. Kanbar thought she was gorgeous and cunning. He loved her quick wit and stubbornness. Kanbar fell in

love with her and made her his queen. After they had their daughter together, they were a tight-

knit protective family and unit. They used their magical powers to protect each other daily.

Wisopia always taught her daughter how to be independent.

She told her, “One day you won’t have a mother, so you better cherish her while you can.”

She taught her daughter lessons that she needed to survive and teach her children in the future. Meslabita never took her mother for granted and always cherished and obeyed her.

Supporting Characters:

Serccia

Serccia was born ten thousand years ago on the ocean planet called Wathena. He looked like a giant lizard. He was orange and had long fur. Serccia was the alien whom all Licends come from. That is where his people resided and had for ten thousand years. He was born in the water caves. He had small eyes and green fangs. His tail was as long as a boa constrictor.

The Licends all looked like him. They consisted of male and female genders. They could speak any language known in the galaxies. They conversed with animals too. His people had complete trust in him. Serccia and the rest of the Licends could live if they had their mesba. It was their life force. It gave radiated the energy they needed to survive.

Serccia watched for many centuries as the Astas became more and more greedy. They threatened the Licend's way of life countless times. At one point they had a peace treaty between them, but it was all a lie. The Astas didn't plan to make peace. The Licends had their precious mesba. They were lost without it. Mesba is what made the Asta way of life.

Serccia and his people were afraid of the Astas. They were intruders on their planet. The Astas wanted to make them pay for taking their mesba from them. They went below the surface and steal mesba from their caves. The Licends could live forever, but they were not magical. They had weapons made of the mesba they protected. They made them into laser ray guns, protective shields, debilitating forcefields, and canons that shot lasers. They were usually peaceful people and only used these weapons in times of war.

Locations:

Fresnias (ice forest)

The Astas considered Fresnias, or rainforests, sacred grounds. They didn't go there to hunt animals or disturb the land. Their ancestors also deemed Fresnia's as sacred grounds. Wathena was divided into two different sections on the ice. Fresnia consisted of half of the water planet. It had many blue, yellow, and red flowers that grew there. These flowers would freeze and unfreeze from the first half of the cyclone to the next.

Many insects would stay in the ice trees and build nests out of frozen leaves they found on the ground. The birds were called scalandars. They were small and brightly colored. They made a noise like a crow. Caw! Caw! Caw! Their bodies could freeze for half the year, and they would continue to live. The second half of the year in the month of Meekna, they would unfreeze and fly to find their mates and mate for life.

The Fresnia was filled with thousands of strange creatures and plants. Some of them resembled Earth's plants and animals. The other half were unique to Wathena and lived on no other planets. The Astar knew it was easy to see why Fresnia was sacred land. A bird called Finsika sang melodies and mimicked tunes that no man or alien had ever heard of.

Fresnia had the most beautiful plants. There were plants of every color: blue, red, pink, orange, yellow, etc. Some colors were unique to Wathena, and some animals shined like a rainbow with them. The trees were bigger than the trees on Earth. They had colors only known to Wathena. These trees were known as Trinkabay. The Trinkabay were home to millions of scalandars and Finsikas, and pintuckets. A pintucket was a type of anteater that lived in the Trinkabay.

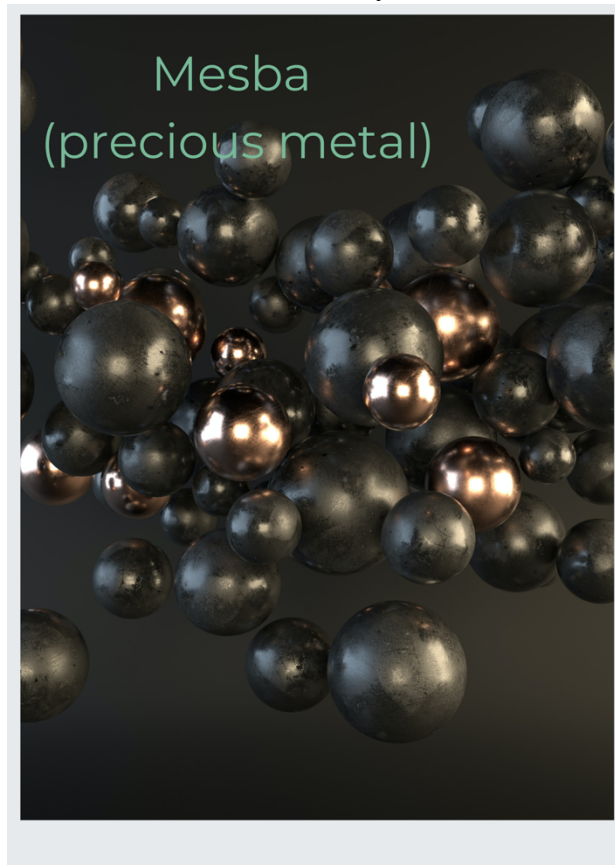

Locations:

Peplosinka (global city)

Peplosinka was the only Asta city. It stretched across half of the globe. The streets were made of mesba. The Asts had humongous homes shaped like gigantic pentagons. These homes were made of mesba. They could change shape into anything they wanted. They could change into a spaceship as well. Around the homes were gigantic bubbles that acted as a second forcefield. These bubbles could link with other house bubbles and take the Asta anywhere. The Asta could visit each through each shield. The magic in their core let them travel through each bubble shield. They could also go without being linked up. This was a faster way to travel. The cold wind of Asta would take them anywhere they wanted to go.

The Asta had motorbikes called tylenops. The tylenops were like motorcycles. They had wheels that could go on land or use jet fuel to make them fly. Their cars were called brombars. Their technology was like the tylenops, except they had ten seats. They looked like purple octagons and

were shiny. Both vehicles' metal was made up of mesba. The Asta had floating trains that were faster than anything on earth. To go underwater they had a type of submarine called a Sinkla. The sinklas were quiet and had mechanical hands that would reach out and steal the Lichen's mesba.

All of Asta's technology was made of mesba. The Asta didn't have many buildings. The only buildings they had were for those who were dying. This would give the dying a place to rest before they went. The Asta deeply respected the elderly. They did everything they could to make them comfortable. They honored them and respected them. The Asta didn't have hospitals.

Locations:

Oceandia

(Wathena's Oceans & Underwater Caves)

Life teemed below Wathena's icy surface. The largest animals below the surface were the Blinzobs. They looked like giant whales on earth. They were yellow, green, and black. They were prickly and could shoot these pricks out in any direction, like a porcupine. They were harvested for their meat by the Licends. Fish, who looked like squid, lived in these waters as well. They were black and squishy. They had long tentacles like an octopus. These fish were called squakins. Puffy fish in the shape of squares swam in punskees or schools. There were millions of different variations of punskees, blinzobs, and squakins. The number of sea life

creatures was so massive, it had never been counted before.

The caves of the Licends held the precious mesba. When the minerals on the cave walls accumulated at just the right temperature, they would grow in sacks. The mesba would be in black metal balls within these sacks. Some of the processes were like a pearl being inside an oyster. Sometimes, they would be in

different colors, like purple and blue. Most of the time they were black. They all had various sizes. The licends lived in these caves and slept on the cave floor. They liked to draw on the cave walls. Their eyes focused better within the dark gloominess of the caves. There were millions of caves throughout the oceans and there were more Licends than Astas.

Additional World Information

The Asta believe in Orcatex. It is the belief in their ancestors and the power they give to the Asta, The Astas don't believe in bringing harm to the plants and animals above the surface. They do not consider the ocean under the icy surface their land. The Asta are an aggressive people and they will bring harm to creatures in the oceandia if they have to. They do not consider them to be their equals. They know it belongs to the Licends. The Licends are territorial because they have been on the planet longer, Both races have traded mesba with each other for a thousand cyclons. The Asta's had four raylons (centuries) in a thousand cyclons (years). Their calendar had fifty plasmas (months) in a year (cinthroid). They had five-hundred and fifty-five bralars (minutes) in an osko (hour). The calendar day celebration was called Brinsbad and the people danced all day this day using ancient dances that were passed down from their ancestors.

The Asta has a magical core descended from their ancestors. When they die, their bodies dissolve on their icy surface and bring forth magical plants. These plants have unique powers that are not found anywhere else on the planet. The Asta's language was called Neembarka. The Asta's only words were those they spoke psychically to themselves and others. The Astas could also make noise. They liked to communicate at a high pitch scream to the Licends. The Licends only communicated in different levels of screams and other noises that would annoy most humans.

The Astas had magical records they kept. They were books called genhos, or grimoires. They didn't need to keep records, but they wanted other races to remember them if their race died out. Triton, their galaxy, has four undisturbed planets around Wathena. The one closest to their sun, called Sonakwe, is a fiery planet that has a magma surface with a rocky terrain underneath. The next planet is one that was full of wildlife and plants. No race had stepped foot

on its surface. Wathena, the ocean planet, was next. The last planet was rocky. It had gaseous rings around it like Saturn. Wathena had three moons.

Synopsis

Angela, her husband, Leslie, and Chrissy were astronauts in 2052. Angela's daughter Rose wanted to tag along. Their Procell's dream was to visit aliens in outer space. They made a wormhole at NASA and went into the future in 3052. They found the new NASA and told them they had used a wormhole to come from the past. NASA didn't believe them. Angela pulled out some old technology from 2052, her cell phone. All their mouths dropped open. The proof was in the pudding.

NASA trusted them enough to help them. They had a hunch as to where one race was located. They told them they could board the newest spaceship they had. They wanted to come back with news of a scientific breakthrough.

The Procells and Chrissy went to the Triton galaxy. The Asta aliens broke out in panic. After six months of the humans living with them, the Asta told them about their upcoming war with a neighboring race called the Licends. They told them they were hoarding their money and metal source, mesba. The humans vowed to help Asta make peace with the Licends. War broke out on the coldest day of the year. Angela had a plan to save both races.

"Hear me now!" she cried above the frontlines.

The return to earth made their nerves jump in anticipation. NASA would never expect what they brought with them.

Story Excerpt:

Climax Scene

Wathena was broken. Its people were dying inside. They were crying out for help. Would their cries fall on deaf ears? The Astas loathed the Licends. They had hoarded their precious metal, their way of life for far too long. War would come this day, on the coldest day of the year. The humans were wrong, there was nothing they could do to help them. The Licends had a thousand years to make peace with them and they insulted them instead. They cursed their names and spit on their land. Their cries would soon be muted. The Astas would soon take back their land by force. The Licends thought they could get rid of them for good. They were wrong. The Astas were like fleas that would never die. All of this would end in hell fire and brimstone.

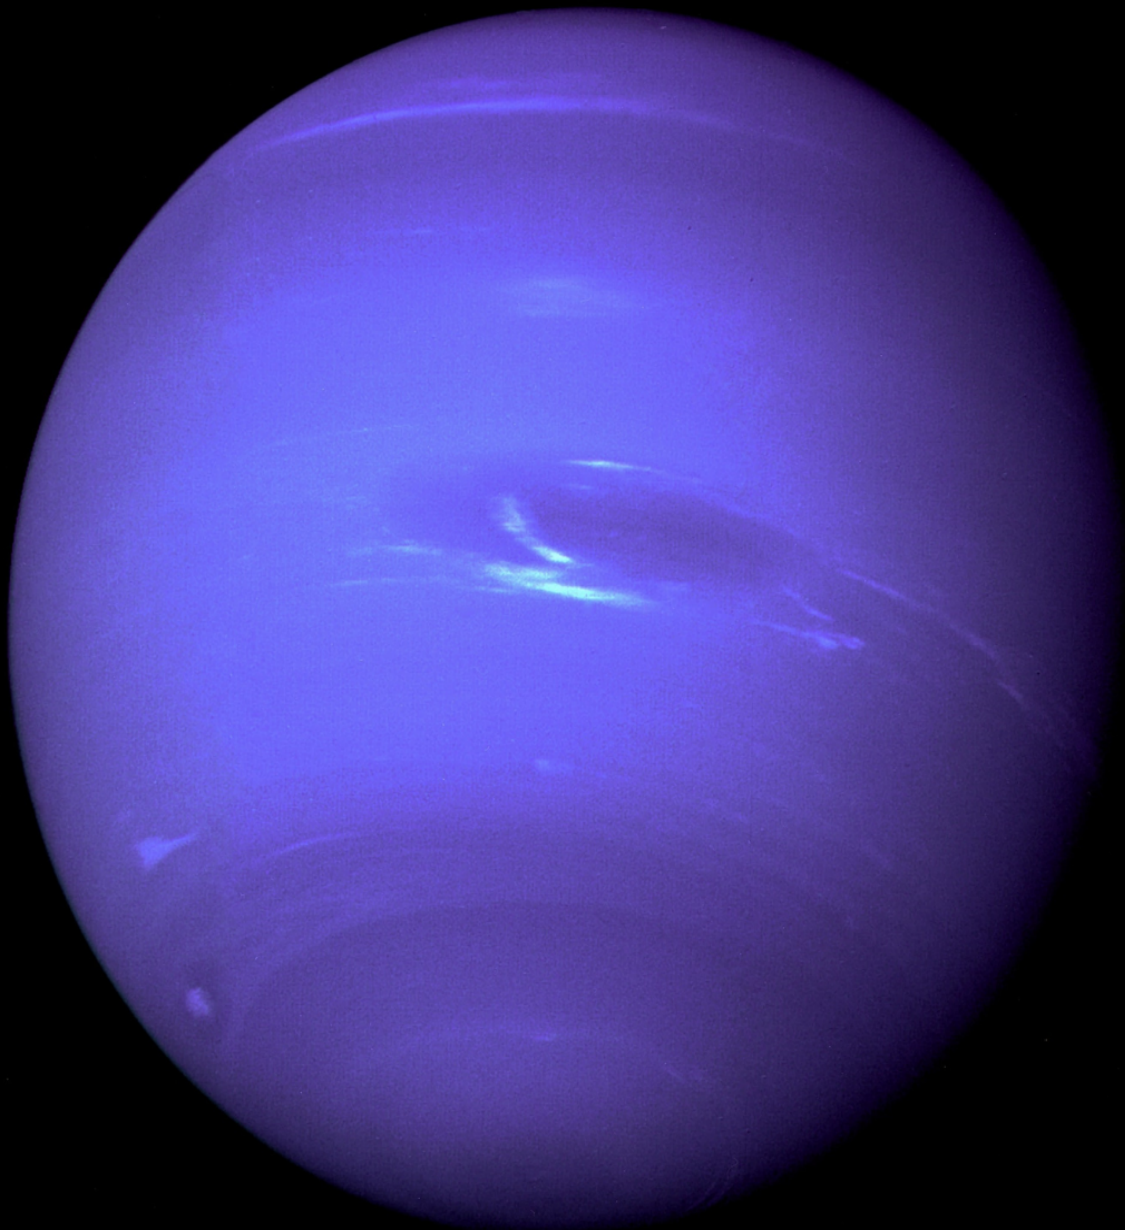

The Licends cried out in shrill screams that pierced the skies. The veil must be taken down. They had tried to become friends with the Asta. The Asta was ruthless and only cared for money and technology to make them superior. They cared for nothing else, and their sight saw nothing but blood. The skies filled a red umber color that mirrored the Asta's murderous intentions.

The two opposing lines met in the middle of the ocean. The Asta's looked like they could take someone out with their menacing stares, The Licends were not afraid of the Asta's magic, they had weapons and technology the Asta could only dream of. The two front lines looked like bulls about to pierce each other through. A booming cry was heard from above the two races.

“Hear me now! I found a way to save both races. The Licends can come with my people to Earth, there they will find better oceans than they can imagine. The Asta will be free to have both the

land above the ice and below and have all the Mesba they want.” Excited cries rose from both armies. The Licends eagerly agreed to this. They were rid of the aggressive and greedy Astars once and for all. They threw down their weapons. Clink! Clink! Clink! The sound was deafening. A new future was on the horizon.

Wathena: Unparalleled
